

DESIGNER_2711 Designer Black Soap Dish

Material Specifications

- #304 Stainless Steel Body
- Powder Coated Finish

Dimensions

- 160mmW x 54mmH x 130mmD

Mounting

- Surface Mount Concealed Fix

Installation Guidelines

- *May be subject to Australian Building Code Regulations for able bodied and/or disabled use, which is the responsibility of the installer.*
 - It is recommended that these units be securely fixed to the substrate (e.g. noggins) or that suitable fasteners or anchors are used to securely affix the unit to the plasterboard, concrete or brick wall.
1. Remove fixing plates from the soap dish using the Allen key provided. Locate fixing position on wall or partition and mark using the left and right mounting holes of both fixing plates (do not put the screw into the middle hole, this can cause the fixing plate to become loose).
 2. Drill holes and loosely secure fixing plate to wall or partition surface using screws and wall plugs provided.
 - It is recommended to cover fixing screw thread with a small amount of silicone to ensure fixing tension and long-term durability and also to minimise tampering.
 3. Check the fixing plate is level and tighten screws.
 4. Secure the soap dish onto the fixing plate bracket using the grub screw with the Allen key.
 5. Ensure the grub screw is fully tightened to finish installation.

This product is AS1428.1 compliant (accessible compliant) when installed in accordance with the guidelines.
