

## ML2310 Concealed Stainless Steel Double Coat Hook

### Material Specifications

- #304 Stainless Steel Body

### Mounting

- Concealed Screw Fix via Fixing Plate

### Dimensions

- 45mmW x 46mmH x 39mmD

### Finish

- Polished Stainless Steel

### Installation Instructions

- *May be subject to Australian Building Code Regulations for able bodied and/or disabled use. It is recommended that any individual unit is installed whereby it clears any other fixtures by at least 150mm and not carry loads any greater than 8kg.*
1. Remove fixing plate from hook. Locate fixing position on wall or partition and mark using top and bottom mounting holes of the fixing plate (do not put the screw into the middle hole, this can cause the fixing plate to become loose).
  2. Drill holes and loosely secure fixing plate to wall or partition surface using screws and wall plugs provided.
    - It is recommended to cover fixing screw thread with a small amount of silicone to ensure fixing tension and long-term durability and also to minimise tampering.
  3. Check the fixing plate is level and tighten screws.
  4. Secure the Hook body onto the fixing plate bracket using the grub screw with the supplied Allen key.
  5. Ensure the grub screw is fully tightened to finish installation.

This product is AS1428.1 compliant (accessible compliant) when installed in accordance with the guidelines.
