- 78mmØ Twist Lock Flange Covers
- Mounting Flanges Welded to Grab Rail for Maximum Strength

Dimensions

- 750mm x 750mm

Mounting

- Concealed Fix - 78mmØ Mount

Installation Guidelines

- *May be subject to Australian Building Code Regulations for height and location fixing and may be subject to placement as per architectural drawings. In all cases, this is the responsibility of the installer.*

- *Fixings and anchors are not included with the units and are the responsibility of the installer to appropriately fix the unit to the wall.*

1. Locate fixing position on wall or partition and mark using mounting holes, ensuring the unit is level.
2. Mount the concealed mounting flanges to the wall using appropriate fixings (not supplied).
 - **Note:** For best results, mount the horizontal component of the unit first to ensure the unit is aligned correctly to the fixing points.
3. Slide covers over mounting flanges, ensuring the raised edges of the flange lines up with the dimples of the flange cover. Twist and lock into place.
4. Check the unit is level to finish installation.
 - **Note:** Apply ample silicone around the fixings to avoid water ingress.

Safety Warning

- Ensure that there is proper structure support within the wall. Grab rails are no stronger than the anchors and walls to which they are attached. Grab rails must be firmly secured in order to support the loads for which they are intended.

This product is AS1428.1 compliant (accessible compliant) when installed in accordance with the guidelines.
